# 5

## Delete Columns in Excel

Click on the letters to highlight columns

Right click and select Delete

- ❖ Columns do not have to be deleted to manipulate the data in Excel, but it can help simplify the spreadsheet
- ❖ Another way to start with a clean set of data is to add an additional sheet to the workbook, then copy and paste relevant data from the original sheet to the new sheet

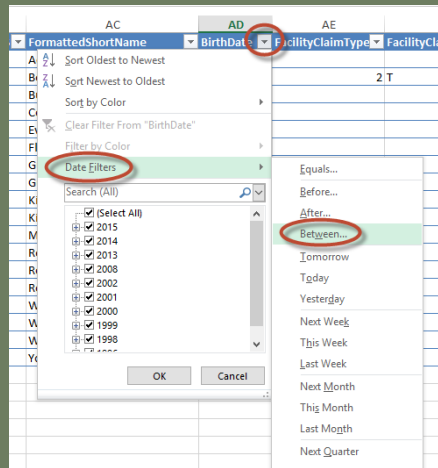

# 6

## Filter on Age

1. Locate column 'BirthDate'
2. Click drop down arrow

## Create Pivot Table in Excel

1. Click on the data elements to compare and drag them to the areas below the list.
2. Always count on StudentSISId by dragging it to Values.
3. Then put the two areas being compared in the columns and/or rows.

Disability	01	02	03	08 (blank)	Grand Total
A	2				2
D	1	6	3	2	12
D,E		1			1
D,K			1		1
I		1			1
N			1		1
(blank)					
<b>Grand Total</b>	<b>3</b>	<b>8</b>	<b>4</b>	<b>3</b>	<b>18</b>

In the example, we are comparing Disability and Educational Environment Code.

## 12 Create Pivot Table in Excel
